Kitchen Design Portfolio

Kitchen Concepts & Design Details

Our kitchen portfolio shows how a complete design develops, from the first layout to the choice of cabinetry and finishing details.

Start with the atmosphere you want to create. Consider how you prepare food, move through the room and spend time with others. The floor plan gives those needs a clear structure.

Each concept then brings the room into focus through a coordinated material palette. Drawings explain its proportions, while the visualisation shows how the finishes work together. Your final design is developed around your own space and confirmed against physical samples.
